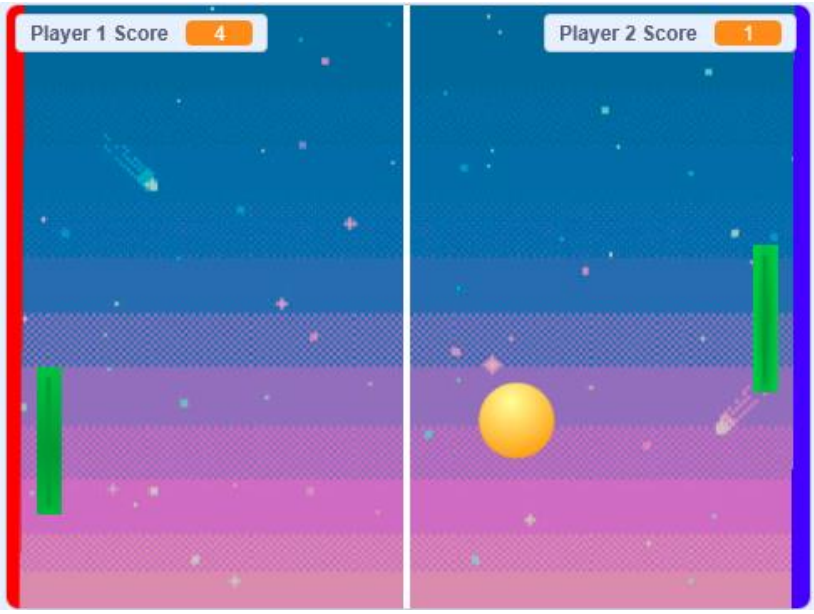
G-5 Game code → Two Player Pong Game

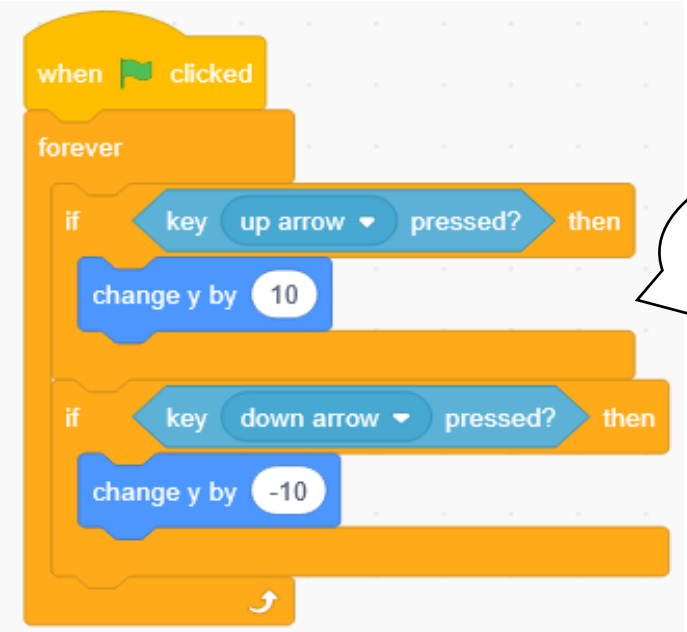
https://www.youtube.com/watch?v=cm0rrH0NWV0

Try to make code for one player shared in GitHub repository.



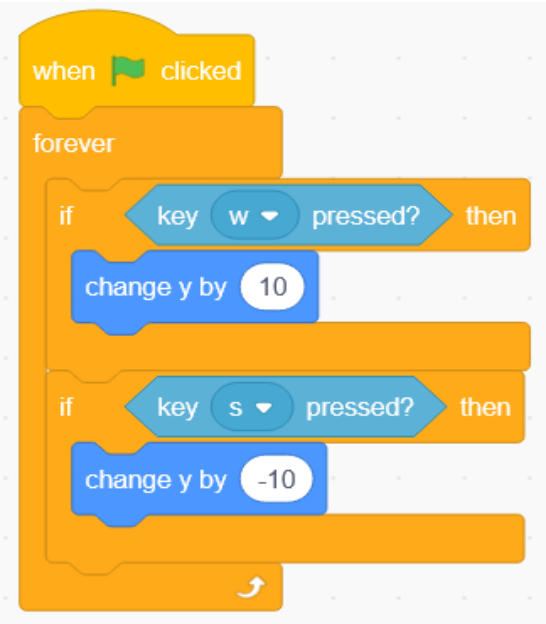
We need 5 sprites: 2 paddles, 2 lines and a ball

Code for Paddle :1



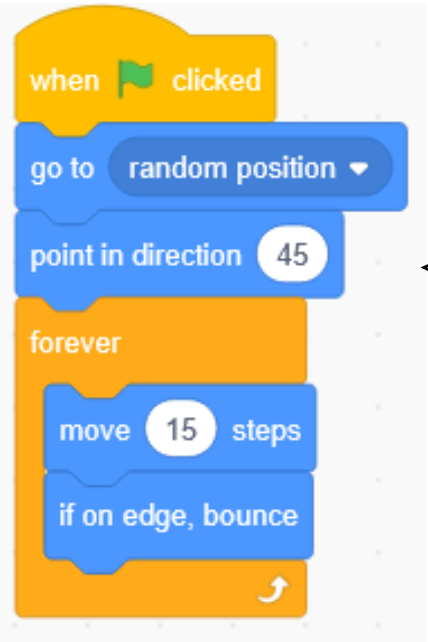
1. Operate paddle 1 through up and down arrow keys

Code for Paddle: 2

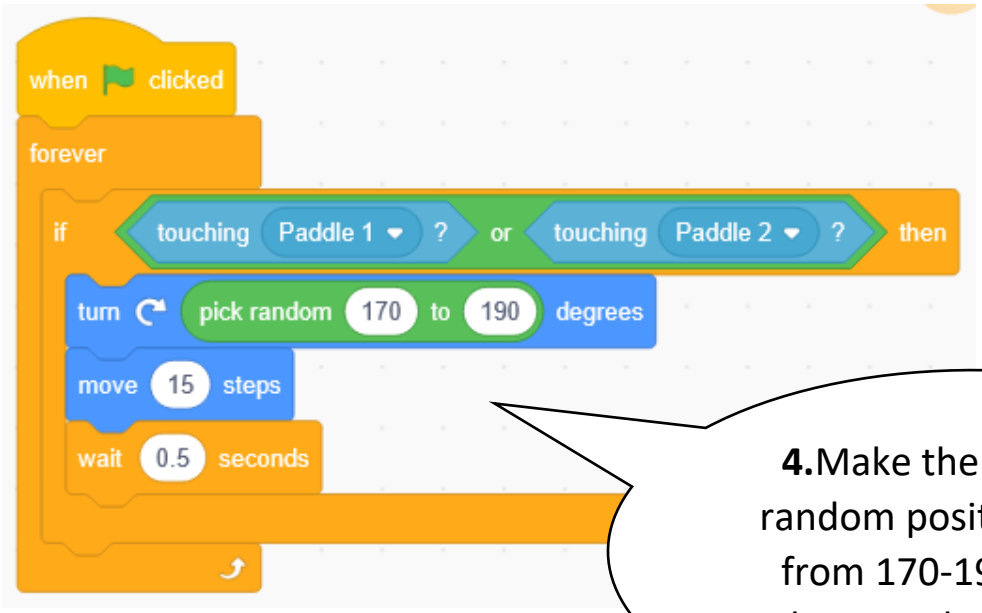


2. Operate paddle 2 through **w** and **s** keys

Code for Ball:

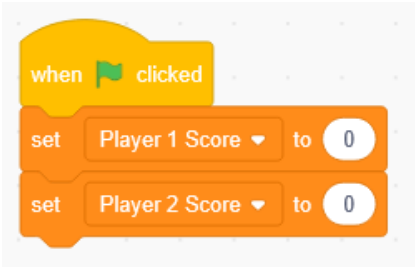


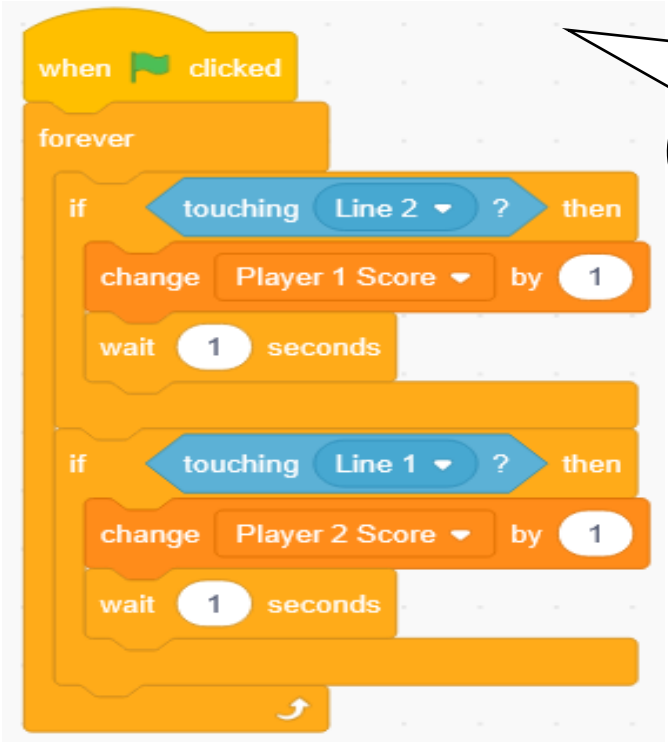
3. Move the ball 15 steps and **bounce it back** when touching the edges. Change the angle of ball to **45** degrees using **point in direction block**



4.Make the ball turn in random position (ranging from 170-190 degrees) when touches the paddle

Score Board:



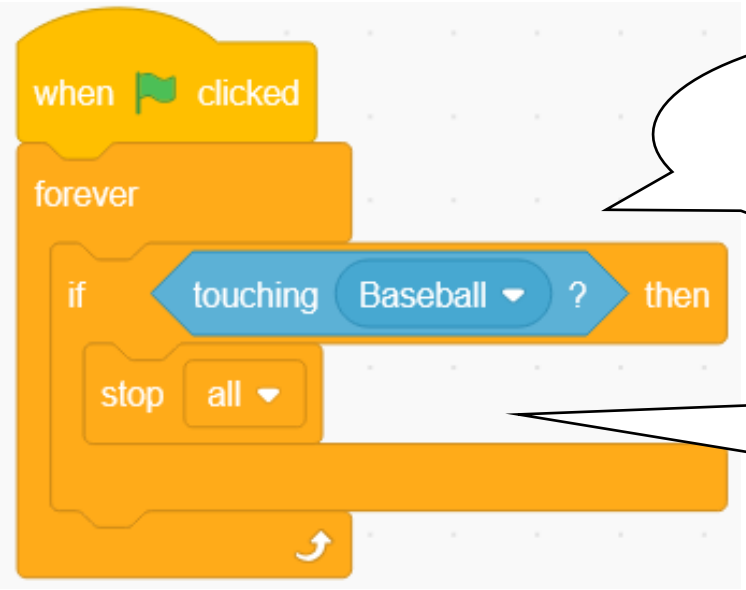


5.Make the score 0 initially and increase it to 1 for each player.

If we want to end the game when ball is hitting the bottom of the screen.

Code for each line:

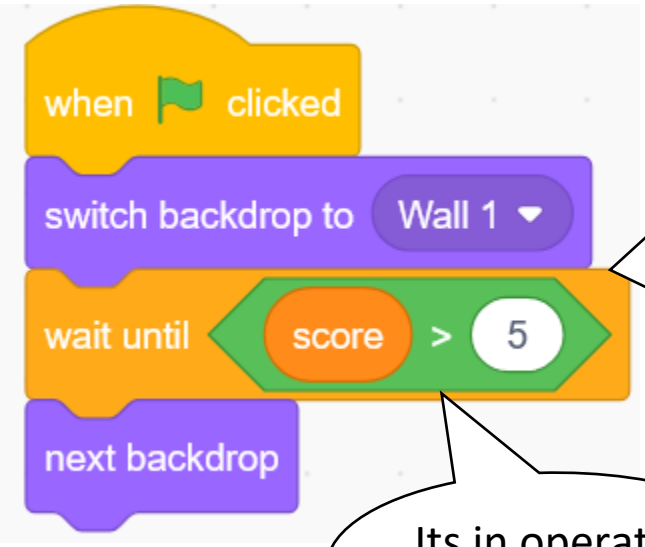
Take a new sprite named line and put it in the bottom of the stage.



6. If ball is touching the line then end the game

Get this block from control section

If you want to add the next level to the game



7. Keep wall background and when score is 5 change the background to show next level

Its in operator section
